RESULTS

CHALLENGE

**EXPERT ANALYSIS
DAMAGE CONTROL**

SOLUTION

Several medical clinics were defrauded of over \$5 million, allegedly at the hands of the practice manager from a regional bank. Navigant was engaged by bank counsel to untangle, analyze, and explain the complex scheme which involved check kiting, fictitious vendors, and poor internal controls. **Our expert testimony ultimately helped the jury determine the bank was not responsible for any damages.**

CHALLENGE

**GLOBAL SCOPE
A WELL-CALCULATED RESOLUTION**

SOLUTION

A telecom company required analysis of damages owed to them in a breach of license case concerning software on mobile phones. Absorbing data sourced from twenty countries, Navigant analyzed millions of document pages — many of them in foreign languages — to determine unpaid royalties due. **The company received a settlement amount very close to the figure calculated by our team.**

CHALLENGE

**INVALUABLE INSIGHT
CASE DISMISSED**

SOLUTION

A major Medicare contractor faced \$180 million in damages pursuant to a false-claims suit alleging manipulation of the claims process to increase administrative reimbursements. Navigant conducted complex data analyses on millions of records and provided testimony on Medicare's regulations for reporting and contracting. **The case was dismissed on summary judgment after our experts demonstrated the plaintiff had inaccurately interpreted the claims data.**
